

FLIPKART SALES ANALYSIS DASHBOARD

PROJECT REPORT

PROJECT OVERVIEW

The Flipkart Sales Analysis Dashboard project was developed to analyze sales performance, profitability, customer behavior, and regional trends using sales transaction data. The dashboard provides a comprehensive view of key business metrics, enabling stakeholders to make data-driven decisions. Various visualizations were created to identify sales patterns, top-performing products, category-wise performance, customer ratings, and preferred payment methods.

OBJECTIVES

- Analyze overall sales and profit performance.
 - Monitor monthly sales and profit trends.
 - Identify top-performing products based on revenue.
 - Evaluate category-wise sales and profitability.
 - Compare sales performance across different regions.
 - Analyze customer ratings across product categories.
 - Understand customer payment preferences.
 - Generate actionable business insights for decision-making.
-

TOOLS USED

Microsoft Excel

- Data Cleaning
- Data Transformation
- Pivot Tables
- Pivot Charts
- Dashboard Creation

Data Analysis Techniques

- Trend Analysis
 - Category Analysis
 - Regional Analysis
 - Profitability Analysis
 - Customer Behavior Analysis
-

DATASET INFORMATION

The dataset contains Flipkart sales transaction records, including product details, customer information, sales amount, profit, category, region, ratings, and payment methods.

Key Fields Included:

- Order ID
- Product Name
- Category
- Region
- Sales Amount
- Profit Amount
- Customer Rating
- Payment Method
- Order Date

The dataset was cleaned and transformed before creating the dashboard to ensure accurate analysis and reporting.

KPI SUMMARY

The dashboard highlights the following key performance indicators:

KPI	Value
Total Sales	₹75.2 Million
Total Orders	1,000
Average Sale	₹75.2 Thousand
Average Rating	3.0
Total Profit	₹15.0 Million

These KPIs provide a quick overview of overall business performance and profitability.

Key Insights and Findings

1. Overall Business Performance

- The company generated **₹75.2 Million** in total sales and **₹15.0 Million** in total profit.
- A total of **1,000 orders** were processed during the analysis period.
- The **average sale value** was ₹75.2K per order.
- The business maintained a positive profit margin, indicating healthy financial performance.

KPI's Cards					
Total Sale	Total Orders	Average Sale	Total Quantity Sold	Average Rating	Total Profit
₹75.2M	1.0K	₹75.2K	3.1K	3.0	15042622.55
Total Sale	Total Orders	Average Sale	Total Quantity Sold	Average Rating	Total Profit
₹75.2M	1.0K	₹75.2K	3.1K	3.0	₹15.0M

2. Monthly Sales Trend Analysis

- Sales remained relatively stable throughout the year, ranging between **₹5.0M and ₹7.6M**.
- July recorded the highest sales (₹7.6M)**, indicating peak customer demand during this period.
- The lowest sales were observed in **June (₹5.0M)**.
- Sales recovered quickly after declines, showing consistent market demand.

3. Monthly Profit Trend Analysis

- Monthly profit fluctuated between **₹0.99M** and **₹1.5M**.
- **July generated the highest profit (₹1.5M)**, aligning with the highest sales month.
- Profit remained above ₹1M for most months, indicating stable profitability.

4. Category-wise Sales Analysis

- **Electronics** emerged as the highest revenue-generating category with approximately **₹17.3M** in sales.
- **Clothing** generated around **₹15.1M** in revenue.
- **Beauty** and **Books** showed moderate sales performance.
- **Home & Kitchen** generated comparatively lower sales.

5. Top Products by Revenue

- **Educational Books** generated the highest revenue among all products.
- **Laptop** and **Table Lamp** secured the second and third positions.
- Revenue contribution was well distributed among multiple products.

6. Regional Sales Analysis

- **North Region** recorded the highest sales contribution (**₹20.3M**).
- **West Region** generated **₹18.4M** in sales.
- **South Region** contributed **₹19.9M**.
- **East Region** generated **₹16.7M** in sales.

7. Customer Rating Analysis

- The overall average customer rating was **3.0**.
- Books** and **Home & Kitchen** categories received the highest ratings (**3.1**).
- Beauty** category received the lowest rating (**2.9**).

8. Profit by Category Analysis

- Electronics** generated the highest profit (**₹3.5M**).
- Clothing** and **Books** each contributed approximately **₹3.0M** in profit.
- Beauty** generated the lowest profit among all categories.

9. Payment Method Analysis

- **UPI** was the most preferred payment method with **176 transactions**.
- Wallet and Debit Card payments were also widely used.
- **Credit Card** transactions were comparatively lower.

Dashboard Snapshot

The dashboard was designed to provide an interactive and user-friendly interface for analyzing sales performance. Filters for Region, Month, Category, and Customer Segment allow users to explore data dynamically. Various charts and visualizations help stakeholders identify trends, patterns, and business opportunities efficiently.

Conclusion

The Flipkart Sales Analysis Dashboard successfully provides a detailed overview of business performance across multiple dimensions, including sales, profit, products, categories, regions, and customer behavior. The analysis revealed that Electronics is the leading revenue-generating category, while digital payment methods are the most preferred by customers. The dashboard enables management to monitor KPIs effectively and make informed business decisions. Future improvements may include customer segmentation, sales forecasting, and predictive analytics to further enhance business performance.
